A PIPELINE OF CU-AU DEVELOPMENT & EXPLORATION PROJECTS

PETER ROLLEY CHIEF GEOLOGIST
9 MAY 2019
No representation or warranty is or will be made by any person (including Hillgrove Resources Limited ACN 004 297 116 ("Hillgrove", "HGO", or the "Company") and its officers, directors, employees, advisers and agents) in relation to the accuracy or completeness of all or part of this document (the "Document"), or the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects or returns contained in, or implied by, this Document or any part of it. This Document includes information derived from third party sources that has not been independently verified.

This Document contains certain forward-looking statements with respect to the financial condition, results of operations and business of Hillgrove and certain plans and objectives of the management of Hillgrove. Forward-looking statements can generally be identified by the use of words such as ‘project’, ‘foresee’, ‘plan’, ‘expect’, ‘aim’, ‘intend’, ‘anticipate’, ‘believe’, ‘estimate’, ‘may’, ‘should’, ‘will’ or similar expressions. Indications of, and guidance on, production targets, targeted output, mine development or timelines, exploration or expansion timelines, infrastructure alternatives and financial position and performance are also forward-looking statements. Any forecast or other forward-looking statement contained in this Document involves known and unknown risks and uncertainties and may involve significant elements of subjective judgment and assumptions as to future events which may or may not be correct. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Hillgrove, and may cause actual results to differ materially from those expressed or implied in such statements. There can be no assurance that actual outcomes will not differ materially from these statements.

Various factors may cause actual results or performance to differ materially. These include without limitation the following: risks specific to Hillgrove’s operations; credit risk; levels of supply and demand and market prices; legislation or regulations throughout the world that affect Hillgrove’s business; insurance expenses; the risk of an adverse decision or other outcome relating to governmental investigations; class actions or other claims; growth in costs and expenses; and risk of adverse or unanticipated market, financial or political developments (including without limitation in relation to commodity markets). You are cautioned not to place undue reliance on forward-looking statements. These forward-looking statements are based on information available to us as of the date of this Document. Except as required by law or regulation (including the ASX Listing Rules) we undertake no obligation to update these forward-looking statements.

This Document is provided for informational purposes only and is subject to change without notice. Subject to any obligations under applicable laws, regulations or securities exchange listing rules, Hillgrove disclaims any obligation or undertaking to release any updates or revisions to this Document to reflect any change in expectations or assumptions. Nothing in this Document should be interpreted to mean that future earnings per share of Hillgrove will necessarily match or exceed its historical published earnings per share, or that there has been no change in the affairs of Hillgrove since the date of this Document. Nothing contained in this Document constitutes investment, legal, tax or other advice. The information in this Document does not take into account the investment objectives, financial situation or particular needs of any recipient. Before making an investment decision, each recipient of this Document should make its own assessment and take independent professional advice in relation to this Document and any action taken on the basis of this Document.

Competent Person’s Statement

The information in this release that relates to Exploration Results is based on information compiled by Mr Peter Rolley, who is a Member of The Australian Institute of Geoscientists. Mr Rolley is a full-time employee of Hillgrove Resources Limited and has sufficient experience relevant to the styles of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code)’. Mr Rolley has consented to the inclusion in the release of the matters based on their information in the form and context in which it appears. All exploration drill results, soil sampling images, and rock chip results have previously been reported to the ASX by Competent Person at the time. The results reported herein are reported in the form and context of the original ASX releases of, 23 November 2004, 14 December 2006, 25 June 2007, 24 July 2008, 1 December 2008, 12 April 2015, 25 May 2015, 18 Oct 2016, 25 May 2017, 20 Oct 2017, 25 October 2017, 31 January 2019, 29 April 2019.

DISCLAIMER & COMPETENT PERSON STATEMENT
Hillgrove’s priority strategic objective is to return value to shareholders in the form of fully franked dividends which will be achieved by:

- Maximising the value from the processing of the existing ore stockpiles
- Realising the potential $31 million cash flow from pumped hydro project sale

Hillgrove is also seeking to return value to shareholders by realising the value of:

- 3.5 Mtpa mill and associated infrastructure
- Unlocking the value of the various development and exploration opportunities in the Kanmantoo Mine Area and nearby region

This presentation will focus on the latter

(1) refer to ASX releases: AGM Presentation 30 April 2019 and Hillgrove Sells the Rights to Pumped Hydro Project 16 April 2019
Hillgrove Resources Ltd (ASX:HGO) holds, or has under application, ~6,100 sq. kms of exploration licences in South Australia.

The focus is on defining copper-gold mineralisation around the Kanmantoo Process Plant,

And thereby to optimise the value of the existing

- low cost Kanmantoo Mill,
- Tailings Facility,
- Community Relationships,
- Geologic data and knowledge

**KEY TAKEAWAYS**

- Key holding in mineralised Cu-Au Province
1. KANMANTOO UG MINE – Stage 1
2. NUGENT UG PROJECT – Stage 2
3. KANMANTOO SOUTH UG HUB – Stage 3
4. EXPLORATION

A pipeline of Cu-Au development & exploration projects
STAGE 1 – KAVANAGH DEEPS
- Utilising the Open Pit Haul Road as a quasi-decline in potential UG development
- Earliest to production
- Timing is Dependent on PHES execution

STAGE 2 – NUGENT DEEPS
- Significant copper and gold outside of PHES Footprint
- Second production centre and springboard to Stage 3

STAGE 3 – KANMANTOO SOUTH UG HUB
- Multiple drill intersections of high grade Cu-Au
- Within a 1 km long corridor for drill testing and evaluation

STAGE 4 – EXPLORATION NEAR AND FAR
- Significant copper and gold targets for drilling
- Some within 4 kms of existing processing plant
- Extensive copper endowment already evident

Realising value for shareholders through a pipeline of Cu-Au projects
HGO has demonstrated the extension of several high grade copper-gold zones beyond the final pit design e.g.

- 21m @ 2.0% Cu, 0.1g/t Au
- 7m @ 2.7% Cu, 0.6g/t Au
- 33m @ 2.1% Cu, 0.2g/t Au
- 12m @ 2.2% Cu, 7.9g/t Au

Resulting in an Exploration Target\(^1\) of

- 5-10Mt @ 1.7-2.2% Cu,
  - 0.4-1.0g/t Au

To 200m below Pit

Note – lack of drilling at depth

\(^1\) ASX:HGO announcement 25 May 2017. The Exploration Target is conceptual in nature as there has been insufficient exploration to define a Mineral Resource. It is uncertain if further exploration will result in the determination of a Mineral Resource.

**KEY TAKEAWAYS**

- Significant >1.5% Cu Equiv zones continue beyond open pit
Kavanagh copper lodes have been the mainstay of the open pit operation and drilling has demonstrated that these lodes continue for over 480m vertically and below the final pit design.

See cross sections through the open pit as examples of the depth continuity of the mineralisation.

The Kavanagh Lode shown in the upper right figure is located 55m from the pit haul road.

This Kavanagh Lode has no drilling to the north, until the cross section shown lower right, ~140m to the north and no further drilling down-dip or along strike.

**KEY TAKEAWAYS**

- Past drilling confirms Kavanagh UG targets and ready for confirmation drilling
- Subject to PHES Agreement
Under the PHES agreement with AGL, HGO be able to exploit the Kavanagh copper lodes via an UG operation for a limited time¹.

Due to the Kavanagh Lodes close proximity to the open pit Haul Road, minimal capital will be required to develop the UG.

Development of the UG will benefit from the existing low cost milling, Tailings Storage Facility and Mining Lease permits which remain separate from the PHES agreement.

¹ ASX:HGO announcement 19 April 2019

**KEY TAKEAWAYS**

- Mining of Kavanagh UG may be possible for a limited time as Stage 1 of the Kanmantoo UG Hub.
Nugent Lode is over 300m long, and 2m to 23m wide. It is a quartz vein system with high Cu-Au.

It is open to depth.

Development of the Nugent Lode and extensions is NOT subject to any PHES Agreement.

KEY TAKEAWAYS

- Investigating stand alone Nugent underground operation, as stage 2 of a Kanmantoo UG Cu-Au Hub.
### Exploration Target

The Exploration Target for the Kavanagh Lodes is over 200m vertical metres and for Nugent is over 450 vertical metres\(^1\).

\(^1\) ASX:HGO announcement 25 May 2017

### KEY TAKEAWAYS

- The Kavanagh and Nugent UG Lodes are the most significant Exploration Targets for UG investigation.
Kanmantoo is a copper-gold mine with a large number of structurally controlled Cu-Au ore zones.

In the area outside of the PHES agreement there are a number of Cu-Au lodes that may be amenable to underground mining. In addition to Nugent there are:

**Paringa**
KTRC956 6m @ 3.4% Cu, 0.2g/t Au from 133m
KTDD129 7m @ 2.0% Cu, 0.1g/t Au from 74m

**Emily Star**
KTRC833 9m @ 2.4% Cu, 0.2g/t Au from 84m
KTRC794 7m @ 2.5% Cu, 0.2g/t Au from 95m

**Wheal Fortune**
KTRC742 5m @ 2.5% Cu, 0.8g/t Au from 13m

**KEY TAKEAWAYS**

- Continuous high grade Cu-Au zones are targets for Stage 3 UG mining evaluation.
In 2019 HGO infilled the 2018 MT survey for which the data is still being processed.

Approx 300m north of the 2018 MT section line, Aberfoyle drilled one hole (KAN001) and intersected;

A 60m wide zone of chlorite-pyrrhotite-Fe-garnet altered sediments (128-170m downhole), within which,

- 3.6m @ 0.39% Cu, 2.43 g/t Au, from 156.4m downhole, including
  - 0.9m @ 9.28 g/t Au, 0.18% Cu from 156.4m downhole; and
- 6.56m @ 0.77% Cu, 0.84 g/t Au from 173m downhole

KEY TAKEAWAYS

- Stella is a large conductivity zone, and is possibly a new style target at Kanmantoo for UG mining evaluation

1 ASX:HGO announcement 30 April 2019
HGO mapping revealed a large area of high Fe and gossan alteration 4.5kms north-west of the Kanmantoo mine site.

This high Fe alteration is coincident with a strong magnetic anomaly evident in the State survey regional magnetics.

HGO has completed stage 1 of a soil sampling survey.
The Copper soil anomaly is 2.3kms long.
Rock chips have identified zones with High Au and Copper.

Further work is in progress.

KEY TAKEAWAYS

- New zones of high grade Cu-Au north west of Kanmantoo are targets for UG mining evaluation.

1 ASX:HGO announcement 29 April 2019
To Recap
Hillgrove does not only hold licences near to the Kanmantoo mine site

Hillgrove also holds, or has under application, ~6,100 sq. kms of exploration licences in South Australia with significant Cu-Au endowment and prospectivity

The objective is to transfer the geology knowledge from Kanmantoo to discover large magmatic Cu-Au deposits in the wider Cu-Au province

KEY TAKEAWAYS
- Key holding in mineralised Cu-Au Province
The Kanappa Cu-Au zone is 50kms from Kanmantoo

A series of diorites, pegmatites and aplites intrude into a sequence of schists and carbonates

Soil copper zone 4.4kms long

Geochem zoning from west to east

\[ \text{Cu-Zn} \Rightarrow \text{Cu-Bi} \Rightarrow \text{Cu-Au} \Rightarrow \text{Au} \]

Peak rock chips of 34\% Cu 4.0g/t Au (separate samples)

Petrology shows the alteration overprints both sediments and intrusives and is high Fe-Cu-W-Mo-Au-Zn

And is post deformation

**KEY TAKEAWAYS**

- Large hydrothermal alteration and Cu-Au mineralised system at Kanappa
Kanappa drilling of a 400m portion of the soil anomaly intersected over 250m width of magmatic related alteration and veining$^1$

- KPDD003 45m @ 0.2% Cu from 45m downhole

Peak values include
- 1m @ 2.7% Cu
- 1m @ 2.5 g/t Au

 Drill core is from KPDD002 from 230.5m, showing pyrrhotite & chalcopyrite mineralisation within calc-silicate alteration

**KEY TAKEAWAYS**

- These drill results confirm Hillgrove’s view that the Kanappa area is prospective for large scale magmatic related copper-gold mineral deposits.

---

$^1$ See ASX Release 30 January 2019 for full results. The company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcement.
The Mt Rhine copper-gold zone is 10kms from Kanappa

Soil copper zone 1.7kms long

Peak rock chips of 13% Cu 49.8g/t Au (separate samples)

Peak Channel Sampling of 6m @ 15.9g/t Au

Much higher gold tenor cf Kanappa

KEY TAKEAWAYS

- Large scale alteration system 1.7kms long and 500m wide
Numerous Copper & Cu-Mo occurrences recorded

Colebatch – outcropping chalcopyrite and molybdenite over 1.6 kms in granite

Alamil – drill core with narrow veins and chlorite/epidote zones of chalcopyrite and sulphides in diorite over 267m, from 86m depth

Sherlock – drill core with SHR08 0.5m @ 11.6% Cu, 1.1% Zn from 102m in basalts and volcanioclastics

Tolmer – visible chalcopyrite in narrow veins in drill core
MTR 12 119.25m downhole in andesites

KEY TAKEAWAYS

- Large Exploration holding is prospective for large scale copper mineralisation
SUMMARY OF DEVELOPMENT & EXPLORATION PROJECTS

STAGE 1 – KAVANAGH DEEPs
- Utilising the Open Pit Haul Road as a quasi-decline in potential UG development
- Earliest to production
- Dependent on PHES

STAGE 2 – NUGENT DEEPs
- Significant copper and gold outside of PHES Footprint
- Second production centre and springboard to Stage 3

STAGE 3 – KANMANTOO SOUTH UG HUB
- Multiple drill intersections of high grade Cu-Au
- Within a 1 km long corridor for drill testing and evaluation

STAGE 4 – EXPLORATION NEAR AND FAR
- Significant copper and gold targets for drilling
- Some within 4 kms of existing processing plant
- Extensive copper endowment already evident

Realising value for shareholders through a pipeline of Cu-Au projects
VALUE REALISATION PATHWAYS

NOT IN ORDER OF PRIORITY NOR PREFERENCE, AND NOT NECESSARILY MUTUALLY EXCLUSIVE

OPTION 1 - IPO
- To list the assets on the ASX with a capital raising and in-specie distribution to existing HGO shareholders

OPTION 2 – JOINT VENTURE
- Joint venture of all or a portion of the assets

OPTION 3 – SALE OR PARTIAL SALE
- Sale of all or a portion of the assets in a similar process to the PHES strategy

THANK YOU FOR YOUR ATTENTION

Realising value for shareholders through a pipeline of Cu-Au projects
