- Production and cash flow in Australia
  - Kanmantoo Copper Mine (100% owned), South Australia
- Rim-of-Fire exploration in Indonesia
  - Sumba gold project (80% owned)
  - Bird’s Head copper/gold project (80% owned)
- ASX listed: HGO
- Shares on issue: 1,178.6 million*
- Share price: AUD0.087*
- Market capitalisation: AUD102.5 million*
- Cash and cash equivalents: AUD17.1 million @ 31 July
- Debt AUD48.1 million @ 31 July
- 49% Institutional shareholders*
- Top 20 shareholders own ~51.6%*

* As at 24 October 2013 unless specified above for the most recent reporting period
KEY ACHIEVEMENTS OVER PREVIOUS 12 MONTHS

- New Life of Mine plan developed Nov 2012
- Second half profit of A$2.9M announced March 2013
- Successful installation of new primary crusher in April 2013, improving reliability and throughput from 2.4Mt pa to above 2.8Mt pa
- Reduction in exploration and corporate costs
- Mutual termination of Kanmantoo Mining Services contract executed in late July 2013, with the support and approval of Hillgrove’s finance partners
- Successful transition to combination owner operated and specialised contractors during Aug / Sept – rapid establishment of new mining team
- 7,040 tonnes of copper in concentrate in first half of financial year, with FY14* guidance of 16,500 to 18,000t of copper
- End July Half Year net profit after tax of $4.0M and EBITDA of $18.6M
- Kanmantoo Insitu Resource of 29.5Mt @ 0.80% Cu, including 4.1Mt added from 2012 drilling – mine life 10 years
- Successful $10.8m capital raising to finalise contract payment and add working capital

* Note: Hillgrove Financial Year refers to the period 1 Feb to 31 Jan
100% owned by Hillgrove

55km from Adelaide, South Australia

Mining Lease is within 500km² Exploration License, and relatively unexplored

Exploration potential considered high

The project enjoys commensurate capital cost advantages

- Close to power (National Grid)
- Recycled water pipeline
- 3km from main highway
- 90km to export port

Attractive employment costs compared to remote fly-in/fly-out mine operations

Quality of life attracts mature, experienced workforce
- LOM plan encompasses immediate resource areas – targeting 10 year life of operations

- Mining performance currently focussed on Kavanagh pit, with mining below old pit in main HG part of orebody

- Nugent under pre-strip operations, to be followed by Emily Star

Note: Rodda will include Emily Star; and Giant will include Giles, Lean and Valentine
KANMANTOO COPPER MINE
MINING STATUS – KAVANAGH AND GIANT CROSS SECTIONS

EOM Survey July 13

Reserve 2013 Model
Blocks Shown > 0.2% Cu
- ROM mill feed in most recent quarter was impacted by weather and the mining services changeover – copper grade of 0.67% in line with resource area mined

- New mining fleet ramp up commenced on 7 August 2013, with focus on quality mining to control dilution, and improving productivity rates

- Improving ore grades now flowing through this quarter
Mill and wet plant continue to perform well

Blended feed to mill (direct from pit and lower grade stockpiles) used to ensure maximum copper production in last quarter and during mining changeout, resulting in a milled copper grade of 0.54% previous quarter

This month new daily records were achieved of +10,800 tonnes milled and ~89 tonnes copper in concentrate
C1 cash costs of production were down to USD2.40/lb (using an average AUD/USD exchange rate of 0.95).

Due to removal of additional equipment from ROM for much of the quarter and a reduction in operating costs, in particular processing.

Average exchange rate has continued to influence C1 costs positively on a USD basis with the C1 cost in AUD terms of $2.53/lb.
KANMANTOO COPPER MINE
MID QUARTER UPDATE - AUGUST AND HALF SEPTEMBER PRODUCTION

- Copper tonnes produced and ore tonnes mined during the transition period and continuing into October has been in line with guidance for FY14* production.
- Combination of owner operated and specialised contractors provides mining quality control and productivity enhancements.

* Note: Hillgrove Financial Year refers to the period 1 Feb to 31 Jan
Improvement in mining productivity and increased material movements (ramping up from 400k to ~600k BCM by February 2014)

Reduction in mining cost per tonne of material moved through
- Improvements to drilling accuracy
- Increased blasting efficiency
- Larger reliable excavators
- Multiple working areas
- Improvements to pit wall design

Reduction in processing cost per tonne through
- Refined engineering design and pump capability
- Use of bulk delivery for concentrated lime
- Installation of an instream analyser system

Project engineering design for controlled potential sulphidisation (metallurgy testing to feasibility standard is complete) to allow profitable processing of 1Mt of oxide stockpile
Enhanced focus on safety, inductions, training and skills assessment through the establishment of new mining operations

A continuing trend of safety performance across the site
77% of staff have been recruited from the Adelaide hills and local townships

- Supports the region and OHS by reducing travel times for new employees
2013 Mineral Resource Estimate is similar in tonnes to the 2012 Mineral Resource Estimate and slightly lower in grade due to the following key factors:

- Additional 4.1Mt largely a result of new data from 141 drillholes drilled in 2012
- 1.89Mt of stockpile
- Depletion due to mining of 2.1Mt and reduction of 3.7Mt due to more conservative application of economic constraints being applied to the model
- Slightly lower overall grade due mainly to lower operating costs allowing a reduced economic cut off, and the grade of additional Resource tonnes added
Revenue for the half was AUD58.6 million at an average realised price for copper of AUD3.50/lb

A revision of C1 costs for 12 months to 31 July 2013 was undertaken, resulting from an adjustment as a result of settlement with the previous mining contractor.

C1 costs for the quarter were USD2.40 per pound

C3 costs for the quarter were USD3.19 per pound
FINANCIAL OVERVIEW

- Strong copper prices realised and expected to continue due to improved AUD/USD exchange rate and Hillgrove’s robust hedge book
- Guaranteed sales outlet through LOM off-take contract with Freepoint Commodities
- Half year FY14 profit: net profit after tax of $4.0M and EBITDA of $18.6M
- Cash and cash equivalents of $17.1M (31 July 2013)
- Debt Facilities of $48.1M (31 July 2013)
  - Project finance of $30.0M (Kanmantoo)
  - Gold loan of $8.1M (Kanmantoo)
  - Mezzanine facility of $10.0M (Corporate)
- Significant free cash flows generated will enable Debt Facilities to be paid down before end of calendar year 2015 as scheduled payments
- Capital raise provided prudent capital flexibility given (i) new mining operations, (ii) transition period reducing full production, (iii) adding back to cash at project level following settlement payments and (iv) continued maintenance of an appropriate buffer given Hillgrove’s debt arrangements and restricted cash
Strong hedge book provides certainty for cashflows and revenue in future periods

Approximately 38,000 tonnes of copper swaps

65-70% of forecast copper production hedged until March 2016 at an average price ~AUD7,950/tonne
Sensitivity (Annual)

- AUD/USD +/- 5% AUD 2.1 million
- Copper Price +/- 10% AUD 4.0 million
- Gold Price +/- 10% AUD 0.9 million

Production (Copper)

- FY14 16,500 – 18,000 tonnes
- FY15 20,000+ tonnes

Costs

- C1 Costs USD 2.25 – 2.50 per pound (at AUD/USD of 1.00)
Strength of new owner-managed operation

- Focus on input costs, dilution and mine to mill efficiency
- Increasing grade to mill, and maximising plant throughput

Focus on increased copper production, cost management, cashflow and profitability to enhance shareholder value

Scheduled repayment of debt

Step-up program for mining to match future stripping requirements

Operational cost and productivity improvements through smart engineering and evaluation

In time, organic growth at Kanmantoo, with potential for future exploration in region

Extract value from well established Indonesian projects

ABOUT HILLGROVE

Hillgrove is an Australian mining company listed on the Australian Securities Exchange (ASX: HGO) focused on the operation of the Kanmantoo Copper Mine in South Australia, and exploration on its Indonesian tenements. The Kanmantoo Copper Mine is located less than 55km from Adelaide in South Australia. With construction completed in late 2011, Kanmantoo is an open-cut mine which has now ramped up to a throughput of 2.8Mtpa, to produce approximately 80,000 dry metric tonnes of concentrate per annum.

Kanmantoo Global Mineral Resource Estimate at end February 2013

Competent Person’s Statement

The information in this release that relates to Mineral Resources is based upon information compiled by Mrs Michaela Wright, who is a Member of The Australasian Institute of Mining and Metallurgy. Mrs Wright is a full-time employee of Hillgrove Resources Limited and has sufficient experience relevant to the styles of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code)’. Mrs Wright has consented to the inclusion in the release of the matters based on their information in the form and context in which it appears.

*Cautionary Statement

The Exploration Target is based on the assumption of a 50% conversion rate of the 2012 exploration drilling program on known near mine targets but is subject to future drilling success. It must be recognised that the potential tonnage and grade estimated is conceptual in nature as the target has not been drilled. It is uncertain whether further information will result in the estimation of a Mineral Resource.
No representation or warranty is or will be made by any person (including Hillgrove Resources Limited ACN 004 297 116 (“Hillgrove”, “HGO”, or the “Company”) and its officers, directors, employees, advisers and agents) in relation to the accuracy or completeness of all or part of this document (the “Document”), or the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects or returns contained in, or implied by, this Document or any part of it. This Document is being provided only to persons to whom securities may be offered without a disclosure document lodged with ASIC or to investors in jurisdictions outside of Australia in which it would not be unlawful to offer securities (please refer to slide 36 (Foreign Selling Restrictions) in this Presentation for more information). This Document includes information derived from third party sources that has not been independently verified. To the maximum extent permitted by law, Hillgrove and its officers, directors, employees, advisers, agents and affiliates exclude and disclaim all liability for any expenses, losses, damages or costs incurred by you as a result of the information in this Document being inaccurate or incomplete in any way for any reason, whether by negligence or otherwise.

This Document contains certain forward-looking statements with respect to the financial condition, results of operations and business of Hillgrove and certain plans and objectives of the management of Hillgrove. Forward-looking statements can generally be identified by the use of words such as ‘project’, ‘foresee’, ‘plan’, ‘expect’, ‘aim’, ‘intend’, ‘anticipate’, ‘believe’, ‘estimate’, ‘may’, ‘should’, ‘will’ or similar expressions. Indications of, and guidance on, production targets, targeted output, mine development or timelines, exploration or expansion timelines, infrastructure alternatives and financial position and performance are also forward-looking statements. Any forecast or other forward-looking statement contained in this Document involves known and unknown risks and uncertainties and may involve significant elements of subjective judgment and assumptions as to future events which may or may not be correct. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of the Hillgrove, and may cause actual results to differ materially from those expressed or implied in such statements. There can be no assurance that actual outcomes will not differ materially from these statements.

Various factors may cause actual results or performance to differ materially. These include without limitation the following: risks specific to Hillgrove’s operations; credit risk; levels of supply and demand and market prices; legislation or regulations throughout the world that affect Hillgrove’s business; insurance expenses; the risk of an adverse decision or other outcome relating to governmental investigations; class actions or other claims; growth in costs and expenses; and risk of adverse or unanticipated market, financial or political developments (including without limitation in relation to commodity markets).

You are cautioned not to place undue reliance on forward-looking statements. These forward-looking statements are based on information available to us as of the date of this Document. Except as required by law or regulation (including the ASX Listing Rules) we undertake no obligation to update these forward-looking statements.

This Document is provided for informational purposes only and is subject to change without notice. Subject to any obligations under applicable laws, regulations or securities exchange listing rules, Hillgrove disclaims any obligation or undertaking to release any updates or revisions to this Document to reflect any change in expectations or assumptions. Nothing in this Document should be interpreted to mean that future earnings per share of Hillgrove will necessarily match or exceed its historical published earnings per share, or that there has been no change in the affairs of Hillgrove since the date of this Document.

Nothing contained in this Document constitutes financial product, investment, legal, tax or other advice. The information in this Document does not take into account the investment objectives, financial situation or particular needs of any recipient. Before making an investment decision, each recipient of this Document should make its own assessment and take independent professional advice in relation to this Document and any action taken on the basis of this Document.
