

Hillgrove Resources (ASX:HGO)

Company Profile

Hillgrove is developing the Kanmantoo underground copper gold mine in South Australia. The project is near term and requires very low capital of only \$26m owing to a combination of the existing infrastructure, which includes a 3.6Mtpa process plant and tailings storage facility, and the close proximity of the mineralisation from the portal which has already commenced. The underground is permitted and enjoys excellent support from the nearby community.
