PRIMARY VENTILATION COMMISSIONED

HIGHLIGHTS

- The primary ventilation has been installed and commissioned at the Kanmantoo Copper Mine.
- The primary ventilation increases underground airflow, enabling additional personnel and equipment to be deployed underground.
- Following the commissioning of the primary ventilation circuit, an additional jumbo has been commissioned and production rate doubled.
- Kanmantoo remains on track for first copper production in Q1 2024.

Hillgrove Resources Limited ACN 004 297 116

Ground Floor, 5-7 King William Road, Unley SA 5061, Australia | **T** + 61 8 7070 1698 | **E** info@hillgroveresources.com.au

Next Steps:

Over the coming months, pit dewatering and a secondary means of egress will be completed at Kanmantoo, ahead of first stoping activities from underground. Concurrently, commissioning the crusher and wet plant circuit will occur in preparation for first copper production.

Authorised for release by the Board of Hillgrove Resources Limited.
